The performance of the software is not bad and it is compatible with almost all the windows versions. You can download Kaspersky Activation Key 2016 from here to get started with your PC. It is absolutely FREE.AMD Radeon R9 390X Review | Source: AMD Price: Author: Mark Campbell AMD Radeon R9 390X Review Last week we looked at the price difference between Nvidia's GTX 780Ti and AMD's R9 290X when compared against each other and it was obvious to see that Nvidia's high end product is cost prohibitive to the average consumer, something that ATI has recognised and has decided to respond to by launching their own high end product. Today we are going to take a look at the product, the Radeon R9 390X and find out whether the card is able to outperform Nvidia's GTX 780Ti or not. When looking at this product we must first recognise that the AMD Radeon R9 390X is not actually a new GPU product. The same GPU architecture that is used in the R9 290X is used in the R9 390X but with a slightly different power regulation and cooling system. The combination of these two changes allows the R9 390X to use a higher clock speed than the R9 290X and provide the same performance as the R9 290X while maintaining the same price. It is clear that AMD wants to compete with Nvidia in the high end GPU market, something that can not be done without releasing a product that can offer the same performance as the GTX 780Ti, but at a lower price. One thing is clear, however, AMD needs to release a product that can perform better than the R9 290X, because the R9 290X can be found for a similar price as the R9 390X at many retailers. The R9 390X is a product that will not be easy to come by and with the high-end GPUs that AMD 82157476af
